is delicious

## Death Stalks The Highway

A recent announcement of the intention of the Federal department of transportation to conduct a campaign to reduce the annual toll of life and limb taken by automobiles and trucks on the highways and roads of Canada should be welcome news to all who use motor-driven power for business or pleasure. The campaign comes none too soon.

Statistics, just published, reveal that in the United States last year over 36,000 lives were lost by accidents in which automobiles and their drivers were the agents of death, in addition to an appalling number who were injured in greater or lesser degree. This means that, roughly, one out of every 5,555 persons in the U.S.A. perished by the automobile in 1935.

No doubt, when the figures are published, it will be found that the automobile accident death rate in Canada for 1935 was comparable to the American loss except allowing for the difference in population of the two countries and the lesser condensation of traffic. In 1934 the Canadian automobile casualty list totalled 1,108 deaths and 17,998 injured, some slightly.

Had 36,000 lives been snuffed out and hundreds of thousands injured in a single avoidable catastrophe in the United States last year, the nation would have gasped with horror. There would have been demands for investigation and the imposition of safeguards to prevent the possibility of recurrence of such an overwhelming catastrophe, but because these deaths and injuries represent nearly as many individual accidents, distributed as has throughout the year and scattered over a wide geographical area, it has been customary to dismiss them with a shrug of the shoulder and a comment about "some fool driver", except by the bereaved relatives and friends.

However, there are indications that citizens of the United States are becoming aroused at a condition of affairs which has become a national menace. This growing concern is largely due to efforts of government agents, corporations, public utilities and the newspapers, to acquaint the public with the facts and to drive home the risks which foolhardy and negligent motorists incur by their conduct on the roads.

Already, it is reported, that these efforts, supported by an aroused public consciousness of individual responsibility, is bringing results in sections of the country where intensive campaigns have been staged.

There is reason to assume that similar results can be achieved in Canada. If organizations and individuals will rally to the support of the authorities who have decided that the time has come when an organized effort must be made to minimize the hazards created by recklessness and carelessness.

Recklessness and carelessness, in the final analysis, are the two factors responsible for the great majority of deaths and injuries on the highways on this continent, on either side of the international boundary.

For many of the accidents that occur on country roads and city streets recklessness must be indicted, and very often criminal recklessness. In this category falls the driver who travels at greater speed than road, climatic or traffic conditions warrant, the driver who passes other traffic near the crest of a hill or on a curve, the driver who cuts in front of another too soon and the driver who beats the train to the crossing.

With respect to the last-mentioned hazard it is interesting to note that figures just secured from the records of the board of railway commissioners show that in 1935, there were 242 automobile smashups at railroad crossings in Canada, resulting in the death of 114 and injuries to 304, an increase of 28 in the number of similar accidents in 1934, an increase of 33 in the number of deaths and 42 in the number of injured.

Carelessness, too, must be marked up as the contributing factor for a large number of these accidents. It may be carelessness while the wheel is in the hands of the driver on the road. It may be carelessness in parking on a road in the dark with lights out. It may be negligence in failing to regularly and carefully inspect the brakes, the tires and the lighting system or in remedying defects when discovered.

And last but not least there is alcohol. Tests by medical authorities and scientists have demonstrated conclusively that the man carrying only a single drink is not as alert as he is normally without it and the man with several drinks inside him is a positive menace to himself, his passengers and those whom he meets or passes.

"Alcohol, according to authorities, 'plays a major part in the appalling list of accidents on this continent.' This is recognized in the posters which are being prepared for distribution as part of the federal government's campaign to ensure greater safety to the users of Canadian highways, one of which reads: 'If you must drink, don't drive. If you must drive, don't drink.'

### Wainwright Buffalo For Germany

Twenty Canadian buffalo cows are going to Europe in an effort to save that continent's bison from extinction. Interior Minister Crerar disclosed. The Canadian bison, living in the Wainwright, Alta., buffalo national park, will be taken to Germany by Luis Heck, director of the Berlin zoological gardens who has taken a leading part in efforts to save the European bison.

### How To Become Efficient

To win fame and fortune in your business, says Prof. Howard W. Hagar, of Yale University, eat five or six times a day instead of two or three. He explained tests showed workers are more efficient the first three hours after eating.

The annual journey of the earth around the sun covers approximately 584,600,000 miles.

No wonder Purity Flour is a favorite for bread. Its richness in nourishing gluten is supplied by Western Canada hard Spring wheat. A strong flour that goes farther—economical.

# PURITY FLOUR

Best for all your Baking

### French Query Service

Post Office Charges Different Prices For The Varying Questions

If you happen to be in France and want to know the date America was discovered, how to make good coffee or obtain a quick divorce, just dial S.V.P. on your telephone.

You will be answered by one of the employees of the new "If you please" service, just instituted by Georges Mandel, Minister of Posts and Telegraphs, Paris. At any hour of the day or night, M. Mandel's encyclopaedians will reply. Ordinary questions are answered for a sum of 6 to 15 cents. Twenty to 30 cents are charged for more difficult queries, and special terms are made for a real "power."

You can also have an errand run by a postoffice cyclist who will deliver you drinks, flowers and anything you like to any address. This will be charged for at the rate of 35 cents in the day and 70 cents at night.

It is expected that plenty of practical jokes will put delicate questions to the new service. But the better the joke, the higher the bill.

### Institution For Beggars

Scholars Taught The Correct Places And Manner To Beg

A "beggars' academy" has been discovered by the police of Pilsen, Czechoslovakia, the famous beer city.

An empty barn in the nearby village of Skrvany was the seat of that institution which had two adult instructors and twenty-six boy "scholars."

The teachers told their pupils how to look miserable and "maimed," and how to behave as "blind" and "dumb-and-deaf." Practical exercises were held, and various bandages and other beggars' appliances were purchased at great prices.

Lessons were also given for writing begging letters, and instructions were given where and how the individual boys had to beg.

The body was handed over to the teachers, who retained one-half and distributed the other half among the boys.

### Strengthening Air Forces

Canada Buying Four New 'Planes For Coastal Defence

The air force defence of Canada is to be strengthened in the spring by four new "protection coastal" aeroplanes ordered by the Canadian government from the Blackburn Aviation Company of England.

The new machines are of the Shark class similar to those supplied to the British naval air service. The machines have an unusual lifting power so as to carry 1,500-pound torpedoes or an equal weight in bombs. They also carry equipment for aerial survey and photography and for artillery spotting and reconnaissance. A supplementary fuel tank slung in the torpedo crutches will give the machines a cruising radius of 1,000 miles.

The machines will be operated by the Royal Canadian Air Force.

### Synthetic Radium

Cornell University Builds Machine To Produce Rare Agent

At a cost of \$5,000 Cornell University has a machine capable of making artificial radium as a substitute for the real stuff, which cost \$40,000 a gram.

Completion of this machine, a cyclotron, the second of its kind in existence, was announced at Ithaca, N.Y. The Cornell cyclotron is already in operation.

The original cyclotron, a machine which uses a \$20,000 80-ton magnet to produce 100,000,000 to 15,000,000-volt rays was made by Dr. E. A. Lawrence at the University of California.

### Depends On Ancestors

The farm flock keeper is rarely if ever justified in keeping hens longer than to the end of the second laying year. But to keep them even that long without a death loss that cuts seriously into profits, it is essential to have flock ancestors that have laid numerous large eggs for three or more years.

A camel cannot go without water longer than three days, without losing strength.

## Climb on the Band-Wagon

Join the cheering thousands of "roll-your-owners" who are stepping-up their smoking pleasure by getting back to Ogden's.

You owe it to yourself to enjoy Ogden's Fine Cut, and you can, when it costs so little! Ogden's rolls best of course, with the best papers—"Chantecler" or "Vogue".

# OGDEN'S FINE CUT

Your Pipe Knows Ogden's Cut Pipe

### Terror Of The Air

New Torpedo Can Travel Four Times Farther Than Fastest Shell

The aerial torpedo, or flying projectile, which can travel four times the distance of the fastest shell ever known, is one of two inventions, many of which revolutionize warfare.

It is the invention of a young man who, working unobtrusively in a laboratory at Queen Mary's College, London, England, is fast becoming recognized as the Marconi of the aeronautical world.

He is Phiroze P. Nasir, aeronautical research student for the Government of India, who although only in his twenties, has already several astonishing inventions to his credit.

His researches make him a person of extraordinary interest to the representatives of other governments, many of which would be glad to know a few of the technical secrets which lie locked up in his brain.

The German Big Bertha could send a shell only fifty miles.

Mr. Nasir claims that his flying projectile, travelling on its own fuel, without a pilot, could travel up to 200 miles at a speed of 300 miles an hour, and could be made to drop at any predetermined distance according to the amount of fuel placed inside. This weapon would enable an air attack to be staged without warning.

Another far-reaching invention is a system of secret guns concealed in the tail of an aeroplane.

The guns are so arranged that immediately another plane comes behind within firing distance it is shot down before it has time to shoot.

A plane of this description, says Mr. Nasir, could attack a whole squadron and produce chaos among them.

### SELECTED RECIPES

#### CRISP COOKIES

Temperature: 400 degrees F.

Time: 15 minutes

2 squares unsweetened chocolate

1/2 cup shortening

1/2 cup sugar

1/2 cup "Crown Brand" Corn Syrup

2 eggs, unbeaten

1/2 cup flour

1/2 cup Benson's Corn Starch

1/2 teaspoon vanilla

1/2 cup finely chopped nuts

Method: Melt the chocolate in the top of a double boiler. Remove from heat and add the shortening, sugar, "Crown Brand" Corn Syrup, eggs, flour, Benson's Corn Starch and vanilla, beating the whole mixture thoroughly, being sure the eggs are added one at a time. Spread the mixture on baking sheets which have been oiled with Moline. Sprinkle with nuts and bake in a hot oven. Cut while warm. These cookies are very crisp and easily made.

#### Old Publishing Firm

A record of 450 years in the possession of the same family is being celebrated by the publishing firm of Faber & Co., Madsburg, Germany. Their first publication was the "Poems of David," which came out in 1485.

### Had Good Excuse

"Annie Mae," said the mistress of the house, finally giving way to curiosity, "I notice you have been taking our empty grapefruit hulls home with you. What do you do with them?"

The negro maid looked up at her mistress with a sheepish grin. "Yes'm," she admitted, "I been carrying 'em home. I ask them they make my garbage look so stylish."

### DO YOU NEED A BUILDER?

WHEN you're miserable and perhaps in need of a good tonic, weight below normal, and you feel tired-out and weak, follow the advice of Mrs. Francis Alcott of 242 Sackville St., Toronto, Ont., who remarked: "I want to praise Dr. Pierce's Golden Medical Discovery as a splendid tonic builder. It has helped me to me to relieve stomach trouble such as indigestion and sour stomach, and seemed to tone up my entire system. This tonic gives me a fine appetite, and strengthens the whole system. I know of no better medicine for its use." New size, tablets 50 cents, liquid \$1.00. Large size, tablets, 10 cents, liquid \$1.50.

Do your friends secretly pity you, because you simply haven't the energy to do the things they do? Are you nervous, irritable, a victim of sleeplessness? Then the doctor you need is PHOSFERINE, the better, PHOSFERINE, the great British tonic, is concentrated energy. You take only a few tiny, economical drops each day... but the effect is astonishing.

Almost from the first dose life looks brighter. You gain new energy. You sleep soundly. You wake thoroughly refreshed. Indigestion, loss of appetite, pains and stiffness, add utter weariness go... and stay gone.

Start taking PHOSFERINE now. Thousands who once suffered from general debility, rheumatic aches, nervous poor appetite and lack of pep and go, and the day they first took PHOSFERINE as the best day in their lives.

PHOSFERINE is splendidly effective at all ages for combating fatigue, sleeplessness, general debility, extended convalescence, nervous, anaemic condition, indigestion, rheumatism, grippe, neurasthenia, nervousness and loss of appetite.

Get PHOSFERINE from your druggist now—in liquid or tablet form—at the following reduced prices—3 sizes, 50c, \$1.00, \$1.50. The \$1.00 size is the nearest four times the 50c size, and \$1.50 size is twice the \$1.00 size.

Are you tormented with the itching tortures of eruptions, eczema, scabs, rashes or other skin afflictions? For quick and happy relief use pure, cooling, antiseptic, liquid D. D. D. Prescription. It gently soothes the irritated and inflamed skin, thus aiding nature itself to heal the disorder. No fuss—no mess. Clear, pleasant and harmless—does up almost immediately. Stops the most intense itching instantly. A 50c trial bottle, at drug stores, will prove it—or money back. D. D. D. Prescription is made by the owners of ITALIAN BALM.

### Instant Relief From ITCHING

Are you tormented with the itching tortures of eruptions, eczema, scabs, rashes or other skin afflictions? For quick and happy relief use pure, cooling, antiseptic, liquid D. D. D. Prescription. It gently soothes the irritated and inflamed skin, thus aiding nature itself to heal the disorder. No fuss—no mess. Clear, pleasant and harmless—does up almost immediately. Stops the most intense itching instantly. A 50c trial bottle, at drug stores, will prove it—or money back. D. D. D. Prescription is made by the owners of ITALIAN BALM.

## Fire Hazards On Farms Can Be Reduced When Proper Precautions Taken

While every person should enlist in the army of fire preventionists, farmers especially, should be careful to prevent fires, says a bulletin authorized by Hartley D. McNair, Ontario superintendent of insurance. There is little or no protection on the farm and when a fire starts it is usually a total loss which can never be replaced and the policyholders are the ones who pay for it in the insurance rates assessed. The loss from farm fire is far greater, too, than the amount of the insurance loss; food supplies are lost; farm families are made homeless, and even industries which depend on the farmer for raw material are affected.

Most farm buildings are of wood, constructed with little thought for fire safety. The buildings of an inflammable nature and hay, grain, straw, food and other materials stored and handled on farms, are an easy prey to fire once it passes the incipient stage.

Statistics show that the majority of farm fires are due to combustibility of farm buildings, defective chimneys and heating apparatus, lightning, threshing, lanterns, gasoline, and spontaneous combustion.

Many of the methods which have been successful in preventing or controlling fires in urban districts are equally as effective in preventing fires on the farm. Practically every roof fire is preventable and with a comparatively small outlay of money farm dwellings can be rendered immune from this dangerous hazard.

A farmer cannot be expected to remove good wooden roofs, but when a building needs a new roof, or when new structures are erected on the farm, a fire-resistant roof should be installed.

Where a farmer is financially unable to immediately protect his building with fire-resistant roofs, an effective agency against roof fires is the spark arrester, which attached to the chimney stands on guard every hour of the day or night. A ladder and fire extinguisher also afford cheap protection against roof fires.

The loss from stoves, furnaces, pipes and chimneys could be eliminated by proper construction of chimneys, replacing worn-out pipes, and a more careful use of stoves and furnaces. During the winter season, the heating system of the farm home will be under a long strain and defects will become dangerous and destroy the home if not detected and repaired.

To the efficiency of the lightning rod is attributable the marked reduction in losses due to lightning during recent years. In addition to the security and peace of mind afforded by this means of protection, insurance rates are much lower where buildings are rodged.

The introduction of modern machinery on the farm while lightening the burden of the farmer has also tended to increase the fire hazard, particularly at threshing time. The attitude of most farmers that, as they have never had a loss by fire, their property is fire-proof, is shattered by the fact that the losses due to threshing operations constitute five per cent of the total farm fire loss.

No one should smoke on the hay racks around the barn during threshing operations. A liberal supply of water should be kept at hand, a ladder of sufficient height to reach the eave of the barn, at least one dry powder fire extinguisher at the engine and a further supply in the barn. Straw or litter should not be allowed to collect around the engine, which should not be operated without a spark arrester.

A spraying device is now being used effectively by a number of threshers. By means of this equipment a fine spray of water is forced into the blower when threshing. This spray, which does not injure the straw, assists in preventing seeds from blowing, the amount of dust is reduced, barns are cooler when threshing in early fall and the fire hazard is eliminated.

Lanterns used in farm buildings should be hung on hooks or wires. As a precaution against fire should the lantern be knocked down or upset, a

simple device may be attached to the stem of the lantern which will immediately extinguish the flame.

In storing hay if from 3 to 10 pounds of salt per ton is sprinkled on the hay its palatableness is improved and the danger of heating is lessened.

The rural communities which have at their disposal the protection of a rural or urban fire truck are fortunate indeed, as many serious farm fires have been averted through their efforts.

Some of the fire hazards on the farm may exist at all times, while others occur at certain seasons of the year. It is, therefore, necessary for the farmer to be always on the alert that these fire hazards may be recognized, eliminated or guarded against, if he is to prevent the possible destruction of his property from fire.

### Housing Plan

#### Dominion-Wide Scheme To Promote Building And Reduce Unemployment

A Dominion-wide plan to promote building activity and reduce unemployment was studied by leading Montrealers. The plan is being submitted throughout the country by Hon. Charles Stewart, minister of the interior in the former King cabinet, and Mervin Brown, ex-mayor of Medicine Hat, Alta. It is understood to have the approval of Hon. C. A. Dunning, minister of finance.

The plan would make effective use of the Dominion Housing Act and those behind it are united in the "Prosperity Housing Association." Mr. Stewart and Mr. Brown outlined the scheme to Mayor Hoad and other prominent citizens who themselves chose a tentative Montreal sub-committee as follows: C. F. Sise, president of the Bell Telephone Company of Canada; J. D. Johnson, president of Canada Cement Limited, and A. B. Purvis, president of Canadian Industries Limited.

Slum clearance is not included in the scheme which is directly concerned with the building of new houses. First item in the program is to establish co-ordinated working committees.

The working committees will seek out prospective homebuilders, submit their plans and take charge of the technical and administrative work. Financing will be done through the Housing Act.

The plan is based on three main foundations: Publicity to include educational work to encourage the building of homes; the technical side, including standards of construction, and the administrative side, co-ordinating the entire movement.

### Largest Tree In World

#### Redwood Capable Of Supplying Lumber For 100 Cottages

Fifteen years of observation, correspondence and collection of data from forestry authorities all over the world convince T. J. Starker, professor of forestry at Oregon State College that he is qualified to name the biggest, oldest and tallest trees in the world.

Fantastic stories of great trees prompted Starker to start his strange quest. Many of the reports proved false, others greatly exaggerated, while many forest giants shrank in size under investigation.

Sequoia, cypress, fir and cypress were the classification of trees receiving the most publicity as to size.

The tallest tree in the world, according to this investigator, is a redwood on North Dyer's Flat in Humboldt state park in Northern California. It is 364 feet high. The largest living thing, in terms of wood volume, is the General Sherman tree, also in California, a big tree which contains 600,120 board feet, enough lumber to build more than 100 good, substantial, five-room cottages.

"Women in Paris are now wearing coats of banana skins," says a fashion writer. So for that matter are bananas.

### Lightning Does Repeat

#### Experimenter Says It May Strike Same Spot 40 Times

A bit of information tending to "debunk" one of the oldest and most popular beliefs was contributed by Karl B. McEachron, high voltage experimenter, during a visit to Denver, Colorado.

Lightning, he said, does strike more than once in the same place. In fact it sometimes hits the same spot as many as 40 times. It all happens so fast, though, that to man it appears as one stroke, he asserted in explaining the "multiple stroke."

McEachron gave several scientifically sound hints on how to avoid being struck by lightning bolts. He listed the following "don'ts" to remember during an electrical storm:

Don't stand under a tree.

Don't sit on the radiator in your home or office.

Don't sit in the bath tub.

Don't use the telephone if you live in the country because lightning arresting wires are not under ground as they are in most large cities.

Don't handle electrical appliances.

Don't stand in front of a fireplace. Pressure may blow out the bricks.

Pressure, McEachron explained, is responsible for much of the damage that accompanies a lightning stroke.

When a tree is struck, he said, pressure is so great that something similar to an explosion occurs.

### A Remarkable Pawn Shop

#### Just Closed In London After 125 Years' Business

Britain's most famous pawnshop, the old Nautical House, in Limehouse, has just been closed after 125 years' business. Seafarers of all nations knew this shop. It is said that in 1846, Charles Dickens sat there on a high stool for four days gathering material for an article on pawnshops.

Many queer stories of London's Chinatown lie behind its closed shutters, on which in scarcely discernible lettering can still be read the announcement: "The Old Established House for Sextants, Ship Chronometers, Marine Glass, Guns, Revolvers, and Munitions."

Nevada now has an automobile for every 2.9 inhabitants. It marks a rise in father's importance. So often in car statistics he figures as 5.

### CROCHET A THROW RUG FOR BEDROOM OR BATHROOM

"Water-lilies and cat-tails!" Doesn't their clean freshness make you want to sit right down and get to work on a brand new crocheted rug for your bedroom—or bathroom? If you've never made—or owned—a crocheted rug, this exclusive Alice Brooks pattern is sure to bring you Beginner's Luck, for it's easy as A B C. Materials? Your trusty crocheted book and some white and colored candlewicking (that heavy cotton thread), rug wool, or useless rags. Whichever your choice, you'll have a rug that's sturdy, washable and a joy to behold! What's more—this versatile pattern also includes a matching towel band design and one for a scarf to be crocheted in string. The Alice Brooks pattern gives detailed instructions for making a rug 24 x 39 inches, scarf and towel band. The stitch, and gives material requirements. Send 20 cents for pattern Y208 to Housewife Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg. There is no Alice Brooks pattern book published.

## Principles Of Good Farming Were Known And Practiced From Time Of Early Romans

University, other seats of learning, literary societies, poetry groups and lovers of the classics the world over are this year celebrating the two thousandth anniversary of the birth of the great Roman poet, Horace—born 65 B.C., died 8 B.C.

With the possible exception of the period between 530 B.C. and 430 B.C., in the days of Greece, when 14 of the world's most illustrious persons lived, it is no doubt safe to say that no one hundred years in the world's history ever produced such a galaxy of men of genius as did Rome during the time from 99 B.C. to the year 1 of our Christian era.

During this period, Horace was born and wrote his immortal Odes; again, curiously enough, fourteen men of supreme genius, this time Romans, enriched the world with their great talents. Poets, prose writers, agriculturists, historians, law makers, orators, commanders, and statesmen. The action and writing of these men in this single century have profoundly affected the whole course of the world's history. Horace, Virgil, Varro, Ovid, Cicero, Julius Caesar, Seneca, Hortensius, Livy, Rufus, Lucretius, Sallust, and the Emperor Augustus.

Considering that the Republic and the Empire of Rome lasted for approximately one thousand years, it seems astonishing to find that so many of the great Romans should have lived during one single century. Most significant to mark also that this brilliant period immediately preceded our Christian era.

Great as may be the justification for scholars and lovers of literature to celebrate this amazing Roman century, during which Horace wrote, it would seem that there is a similar justification for farmers and institutes of agricultural science to celebrate as well, for included among the fourteen illustrious Romans cited were three who sang and wrote immortal verse and prose on agriculture.

Virgil, whose Georgics is considered to be the greatest poem on agriculture ever penned; Varro, who wrote the earliest scientific book on prac-

tical farming; and Ovid who tells us of the plants, herbs, shrubs and trees of those days.

The Roman mind of that period was pre-eminently practical, and the people then loved and revered agriculture, which they considered, above all other occupations, to be the most honorable.

During the one hundred years in question, Rome extended her boundaries over many parts of the then known world, and carried, with her conquering legions, law, order, good government and good agriculture, which virtues have persisted in those countries until to-day, two thousand years afterwards.

The education of the Roman boys and girls of the period was designed to fit them for farm life. Girls were taught to manage a home, to spin and to weave; boys to plow, sow, reap, and to manage the business affairs of the farm, and, as well, to know how to conduct the various offices of the state, including the very highest, for farmers, above all others, were chosen to fill these exalted positions.

The character of the young people was moulded so as to develop a respect for parental authority and for law and order. They were taught to be modest in speech, discreet in behaviour, and as well to be thrifty and self-reliant.

Virgil and Varro, and other Romans of the period, tell us of these things, and they set out simple principles of good farming which are as sound to-day as they were then. Of the value of the production of varieties of crops and of breeds of livestock which were suited to the district. Of the use of good, pure seed, and of good, well-bred sires. Of the virtues of good plowing and cultivation. Of the necessity of eliminating all weeds. Of detailed methods of conducting efficiently every operation of the farm. They also instruct us in the care of plants, animals, and the equipment of the farm, and in the proper consideration of the people employed. Of the profitable employment of every hour in the working day including rainy days, and of the elimination of idleness.

Above all, these writers enjoin us to consider the pleasure of farming to be a reward commensurate with material gain.—Searle Grain Co. Bulletin.

### How Royalty Makes Tea

#### King George Has Own Recipes For Cold Beverage

During a royal "shoot" at Sandringham, a member of the party pulled out a flask and took a drink. The King noticed the action and asked what beverage it was that gave him so much satisfaction. "Cold tea, sir," was the reply. The King smiled, saying: "But it is not made the right way, I am sure." "Oh, yes sir, I think it is," said the other, "poured off the leaves and allowed to get cold."

"That's not the way," said the King. "My way is the only really good way of making cold tea—it must be made with cold water."

Of course, there was a respectful outburst of dissent, but the King stuck to his point and there and then told them how to make "royal tea," and here is the recipe.

Take the ordinary quantity of tea—a teaspoonful for each person and one for the pot—put it in a jug, and pour in as much cold water as you require. Then allow the mixture to stand for 12 hours, pour it off the tea leaves, and add milk and sugar according to taste—and the result is cold tea fit for a king. It is this tea that the King always carries with him on shooting or fishing expeditions.

The King shares with most Englishmen the habit of taking the odd cup of tea at any time of the day or night. But the head of the House of Windsor goes further than the average Englishman inasmuch as he has facilities for making tea installed in his dressing room, ready for any emergencies or for wakeful hours.

No direct descendants of George Washington are living.

## Now Science Explains Why So Many People Past 40

Feel That They're Slipping  
Losing Their "Grip" on Things

Many people "round 40 think they're 'growing old.' They feel tired a lot... 'weak.' Have headaches, dizziness, stomach upsets.

Well, scientists say the cause of all this, in a great many cases, is simply an acid condition of the stomach. Nothing more.

All you have to do is to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, the Phillips' Milk of Magnesia after meals and before going to bed. That's all!

Try this. Soon you'll feel like another person! Take either the familiar liquid "PHILLIPS" or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

**PHILLIPS'**  
Milk of Magnesia

## WORLD HAPPENINGS BRIEFLY TOLD

Bernt Balchen, trans-Atlantic flyer and Polar explorer, visited the United States to arrange a feeder service from Norway to North America with Pan-American Airways officials.

A 720-mile telephone line linking Jerusalem and Baghdad was opened with a conversation between the chief secretary of Palestine and the premier of Iraq.

All Alberta lawyers appointed as "king's counsel" will be charged \$100 for letters patent, instead of \$25 as in the past, Premier Aberhart announced.

Inspired by advance notices of the golden jubilee celebration in Vancouver from May 24 to September 7, Edmonton businessmen are planning to organize a special train for a visit.

Hon. Raymond Brugere, French minister to Canada, announced building operations would commence in Ottawa next spring on a new legation and minister's residence to cost \$308,000.

Vulcan, a town of less than 1,000 population in a wheat district of southern Alberta has no financial worries. At the end of the fiscal year, Dec. 31 last, it had a surplus of \$12,403 in the bank.

Five one-dollar bills from the Dionne quintuplets—first contribution to the Young Men's Christian Association campaign in Toronto were not to be used as mere money. The bills were auctioned to increase the fund.

Discovery of a reclamation method which is expected to greatly widen availability of helium gas for treatment of asthma was announced by Dr. Alvan L. Barch, of the Columbia University College of Physicians and Surgeons.

## Constipation Gone!

Suffered since twelve years old. Fruit-a-tives brought lasting relief. Now enjoys life.

"Since twelve years old I was ill with constipation. Then three years ago I started Fruit-a-tives. They are mild and gentle in action, and they gave me wonderful relief. I am now able to enjoy life once more."—Mrs. F. Williamson, Montreal.

Containing extracts of APPLES, ORANGES, FIGS, PRUNES and HERBS, Fruit-a-tives are natural—do not contain habit-forming drugs. They work to strengthen the system of elimination. The tonic effect helps bring lasting, glowing health.

**FRUIT-A-TIVES** NATURAL FRUITS AND HERBS

## Eye To See In Dark

Vacuum Tube Shows Scene As Sharp As Visible Light

Science has given man an eye to see in the dark—a foot-long vacuum tube on which the invisible infra-red and ultra-violet rays that fill the air form a visible, living, moving, continuous image.

The new tube was shown for the first time at a general meeting in St. Louis, of the American Association for the Advancement of Science by its discoverers and inventors, Dr. V. K. Zworykin and Dr. George Morton of the Radio Corporation of America laboratories.

The scene revealed by the vision tube is greenish-black and white, without other colors. But it is as sharp and distinct as visible light.

Many practical applications appear to be immediately realizable. An airplane with such a telescope could guide itself into a secret landing field by an infra-red, or black light, beacon so dark as to be invisible to persons near it on the field.

A plebskite is a form of voting introduced in France under the Napoleonic regime by which the whole body of voters ratified or refused to ratify a legislative enactment.

## Matter Still Undecided

Emblem For Province Of Saskatchewan Hard To Find

The black-eyed sultan and the tiger lily, the waving, the chickadee, the grouse and the wild goose, were all advocated before a meeting of the Regina Natural History Society as flowers and birds emblematic of Saskatchewan. But the society left the matter over.

Ald. J. H. Taylor, president, pointed out that the society wasn't trying to have the emblem adopted as its own suggestion but aimed to interest other organizations, the Horticultural Society and the Fish and Game Society. A Saskatchewan emblem would then be pressed for before the legislature.

Prof. H. Schmidt, representing the Regina Horticultural Society, stated that organization had adopted the prairie rose as its emblem until it was found that Alberta already had the flower.

Mr. Taylor, noting that a newspaper correspondent had urged the grasshopper and dandelion be put in the emblem, termed the man a "horror culturist," not a horticulturist.

A Boston harbor attracts trade by serving tea to his customers.

## LUXURIOUS ATLANTIC TRAVEL

—Cunard White Star Photo

Artist's impression of Third Class Winter Garden in new superliner "Queen Mary".

—Cunard White Star Photo

Stateroom in the new Cunard White Star superliner "Queen Mary", which will make her maiden voyage May 27, 1936.

## This new knit boasts a lacy weave

Household  
Made  
by  
Alice  
Brooks

This Blouse  
is a  
Flattering  
Model

## PATTERN 5518

All who knit will bubble over with excitement when they learn this flattering young blouse is a "jiffy knit" and easy to make. In lacy stitch, for the most part, the yoke's just plain knitting, and how smoothly it fits! Grand in Shefford rose for Spring or Summer; you may knit a plain skirt, too.

In pattern 5518 you will find instructions for making the blouse and skirt in sizes 16-18 and 38-40; an illustration of the blouse and of all stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 170 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## Kindness Was Rewarded

Woman Receives \$1,000 Legacy For Befriending Stranger

A few minutes' hospitality and a little kindness shown by a Prince Edward Island woman to a stranger 36 years ago has been remembered by Mrs. Reuben Cate, a native of Summerside, by Miss Grace Fletcher Kelly, 80-year-old eccentric Boston recluse, who died in that city recently.

In 1900, Miss Kelly was in East Concord attending the funeral of her sister, which was being held in a cemetery directly adjoining the lot on which stood Mrs. Cate's home. After the service Mrs. Cate noticed Miss Kelly standing, overcome with grief, beside the grave. Although she was a stranger, Mrs. Cate went to the graveyard and invited the Boston woman "to come in and rest and have a cup of tea."

Miss Kelly accepted the invitation, and said on leaving: "I'll never forget you for this."

## Tamed A Canadian Goose

American Boys Find And Befriend Exhausted Fowl On Southern Flight

Enslaved boys found a wild Canadian goose in their field in Canada, Texas, last year, exhausted by the long flight from the North. The boys adopted the goose.

But the following spring a flock of wild geese went north and the Bures pet took to the air with them.

This year a flock again passed over this village. A lone gander dropped out of the sky and came to rest among the Bures chickens, tame as ever before.

## New Tax For Turks

The Turkish Grand National Assembly is expected to pass forthwith an act whereby all persons will contribute two per cent. of their salaries for military aviation. This will be the fourth salary tax, the others being income, crisis and equilibrium taxes.

## SUNDAY SCHOOL LESSON

JANUARY 26

### JESUS DECLARES HIS PURPOSE

Golden text:

The Spirit of the Lord is upon me, Because he anointed me to preach good tidings to the poor;

He hath sent me to proclaim release to the captives, And recovering of sight to the blind,

To set at liberty them that are bruised,

To proclaim the acceptance year of the Lord. Luke 4:18,19.

Lesson: Luke 4:16-44.

Devotional reading: Isaiah 61:1-3, 10, 11.

### Explanations and Comments

**Jesus Declares His Purpose, Luke 4:16-21.** Jesus came to Nazareth, where he had been brought up, and where he had lived through his early manhood until the age of thirty, and on the Sabbath entered the synagogue as his custom was. From the age of four he had been trained by his parents to regard the synagogue services, and now that he had come back inspired for his great work he continued to frequent the place of worship.

As requested by the presiding officer of the synagogue, or of his own accord as was frequently done, Jesus stood up to read the morning lesson. The attendant (verse 20) in whose charge were the rolls, handed him the roll of the prophet Isaiah, and he unrolled it at the sixty-first chapter and read the first two verses, adding thereto the clause from Isaiah 58:6, "to set at liberty them that are bruised." He purposely inserted these other words in the passage read, in accordance with a common custom. The rabbi said: "The reader of the Gospels may skip from one text to another, but he may not skip from one prophet to another, but in the twelve (minor) it is lawful." This passage, in which the prophet declares to the exiles their approaching deliverance, is now read in Jewish synagogues on the Day of Atonement, and may so have been read at the time" (Dummelow).

**The Inequality of the People, Luke 4:22-24.** All his hearers were astonished at the words of grace which Jesus spoke, but the effect of the words was neutralized by their long-time acquaintance with him, for they said, in a burst of talk as the discourse ended, "Is not this Joseph's Son?" And therefore not the Messiah, no one greater than the prophet, and certainly not the Messiah, they meant. Seeing Jesus in the flesh presented their seeing Christ in Jesus.

You can't be careless with cold. They can quickly develop into something much more serious. At the first sign of a cold take Grove's Bromo Quinine. Grove's has what it takes to stop that cold. It's the only one that's a Druggist. Ask for Grove's. They're in a white box.

## NAVAL PARLEY IS NOW CLOUDED IN UNCERTAINTY

London.—Japan walked out of the international naval conference and the future of limitation of naval armaments—an established fact for 13 years—was clouded in uncertainty.

All delegations, including the Japanese, made clear they wanted to avoid a naval building race. Nevertheless, in some quarters this was seen as an eventual possibility resulting from the breakdown of the five-power conversations.

Japan's move was because the four other powers—and with them the British dominions represented at the conference—refused to grant her demands for naval parity with Great Britain and the United States.

Abandonment of the parley by the Japanese was quickly followed by a veritable rain of statements and explanations from all delegations designed to show why the meeting broke up.

Britain, the United States, France and Italy voted to continue in an attempt to work out a limitation agreement without Japan.

Lingering hopes were expressed in British and American quarters that the Japanese might return to the conference and that the development would not harm relations between them on other questions.

Admiral Oseami Nagano, head of the eastern delegation, said in a statement Japan does not want to embark upon a naval race and was determined to cultivate amicably the most friendly relations with other nations. There were no indications that this reassured the other delegates, however.

The British labelled Tokyo's proposal "suicidal" to the British Empire in the present state of the world.

The British position, it was said in authoritative quarters, was that while she has responsibilities in European waters, the Atlantic, Indian and Pacific oceans, she was asked to uphold all those responsibilities with a fleet no larger than that of a country concerned with one, or at the most two, of these seas.

Hinting at uncertainties developed from the Italo-Ethiopian war, it was said that it is plain to-day that the British navy is as necessary to "uphold collective security" as to defend its own country.

After the meeting an American spokesman said:

"We will join a four-power conference because we do not want a naval race.

"Naturally we will have to consider a possible case of some contingency in case Japan or some other power starts building."

"There will probably be some escape clause in any agreement the four powers may reach so as to take care of any such contingency."

## Civil Service Examinations

### Westerners Figure On First Fifteen Of English List

Ottawa.—The civil service commission announced that Aaron B. Handler of Kingston, Ont., headed the English list of 62 successful examination candidates for the eligible list of Grade 4 clerks in the government service.

The examination, open only to graduates of universities, was held to establish a list from which men for key positions might be drawn and trained to hold executive posts in the service.

The first 15 on the English list included:

Edward A. Bence, Saskatoon; Russell H. Taber, Regina; Henry S. Ferns and Gordon H. Josie, Winnipeg; Solomon Milner, Regina, and Francis V. Kinahan, Calgary.

### Will Conduct Survey

Halifax.—A reliable source said William Duff, Liberal member of parliament for Antigonish-Guysboro, would leave soon for New York and Washington to conduct a survey of reactions to the Canada-United States trade agreement.

## Bank Employees Shot

### Two Members Of Bank Of Commerce Staff In Vancouver Shot In Holdup

Vancouver.—Police arrested three known underworld characters and held them for investigation in the holdup of the Powell street branch of the Canadian Bank of Commerce where two bank employees were shot, one probably fatally, by three bandits who escaped with \$1,200.

Meanwhile chief of police W. W. Foster announced the Canadian Bankers' Association had offered \$5,000 for information leading to the arrest of the gunmen involved in the holdup which cost young William H. Hobbs, former Radisson, Sask., bank clerk, his life and sent Thomas Winaby, bank manager, to hospital with a bullet wound in his left arm.

Winaby also came from Saskatchewan where he was manager of several branches until transferred here in 1927.

Despite the three arrests officers continued to scour the city.

The wounded men were rushed to hospital where it was found the bullet had pierced Hobbs' throat, striking his spine and paralyzing him. An emergency operation was performed and he was put under an oxygen tent.

Hobbs, 25 years old, was formerly with the Canadian Bank of Commerce at Radisson, Sask. He came to British Columbia in 1933. His parents were reported to be living in Edmonton.

## Ontario Town Wrecked

### Natural Gas Supposed To Be Cause Of Explosion

Wheatley, Ont.—Natural gas, escaping from a heater, is believed to have caused the terrific explosion which shook this town, demolished the Oddfellows' block and caused damage estimated at \$50,000. Two women returning from a party were knocked down by the blast and struck by the flying debris but were not injured seriously.

Only a single wall remains of the building, considered Wheatley's finest. The post office village council chambers, Gillies funeral parlors, and lodge quarters were obliterated, while mail and town records went up in smoke as fire ensued following the explosion.

Those villagers who were first on the scene said they saw four balls of smoke and flame burst through the roof of the building, and then the entire structure crumbled into a heap.

## Heckler Asks Question

### Malcolm MacDonald Is Queried Regarding Canadian Oats

Dingwall, Scotland.—Canadian oats entered the picture here by-election battle in the constituency of Ross and Cromarty.

"Could you not, as dominions secretary, have already stopped excessive importation of Canadian oats?" a heckler questioned Malcolm MacDonald at a meeting of farmers in Dingwall cattle market.

"I have been dominions secretary only a few weeks," MacDonald replied. "It depends on you whether I am going to remain dominions secretary for more than another few weeks," he continued amid laughter.

His policy was the home producer first and the dominions second, MacDonald said.

## Alaskan Cities Quarantined

### Mild Cases Of Scarlet Fever In Many Places

Anchorage, Alaska.—Anchorage joined the list of "quarantined cities" as scarlet fever cases numbered seven, all mild. The schools were closed and public gatherings banned. Fairbanks and Palmer also have been quarantined for scarlet fever and smallpox.

Seward, Alaska.—Dr. A. D. Haverstock of the public health service, asked the coast guard cutter Morris to be dispatched from Cordova to Port Graham, where 15 persons were reported ill of an undetermined malady.

Port Graham is a fishing village on Cook inlet, near the tip of the Kenai peninsula.

## EMPEROR'S ADVISER

Admiral Viscount Mako Saito, former Premier of Japan, who has been installed as keeper of the Privy Seal—a post which enables him to become one of the chief advisers of Emperor Hirohito, Saito is a strong opponent of army dictatorship.

## Farmers' Lot Is Improved.

### Position Of Canadian Agriculture Better Than A Year Ago

Ottawa.—All factors considered, the position of Canadian agriculture is better now than a year ago and there is reason to hope one year from now the position will be further improved, according to the annual survey and outlook made public by the department of agriculture.

This annual survey serves to a considerable extent as a guide to farmers in their spring planting.

After a comprehensive review of the wheat situation the review said:

"While the wheat situation is so far as Canada is concerned is involved at the moment, yet this country must and will continue to produce wheat on a substantial scale. It should be noted, however, that in view of the greatly reduced world import demand the wheat produced by a normal yield on an acreage similar to that sown in 1935 would be difficult of disposal.

"The quality of Canadian wheat has long enjoyed an enviable reputation on the world's markets and this must be maintained. In certain sections of the west, but chiefly in the so-called 'park belt,' the quality is liable to be below the average and in such sections it would seem desirable to adopt a system of farming that would involve a diversion of some of this wheat land to other crops. Fortunately, these sections are better adapted to coarse grains and livestock than are certain other areas that are restricted largely to wheat."

### A Valuable Discovery

New York.—Discovery of a reclamation method which is expected to greatly widen availability of helium gas for treatment of asthma was announced by Dr. Alvan L. Barach, of the Columbia University College of Physicians and Surgeons.

## Storage Of Gas

### First Attempt In Canada To Store Gas Underground

Calgary.—Successful storage of gas in a depleted field—the first known attempt in Canada to store gas underground—has been accomplished according to an announcement by P. D. Mellon, general superintendent and chief engineer of the Canadian Western Natural Gas, Light, Heat and Power Company.

The company has repurchased the Bow Island gas field. Mr. Mellon said, and 8,000,000 cubic feet of gas had been stored in the field up to Dec. 31 1935. Of 27 wells in the field, 18 were sealed and the nine others were recommissioned and made available for receiving and repressuring purposes.

Experiments were first carried out in the field, the engineer stated, and when these proved successful in raising the pressure by injecting 37,000,000 feet of gas into eight wells, raising the rock pressure 30 pounds per square inch, the Dominion government co-operated by issuing an order-in-council withdrawing the rights to file or drill on approximately 20 square miles of territory.

## Army Budget Doubled

### Soviet Will Spend Large Sum To Strengthen Forces

Moscow.—After repeated charges aggressive neighbors are threatening the Soviet Union with war both to the east and west, the government announced its military budget for 1936 will be more than double that of last year.

During 1935 the standing army was brought to approximately 1,300,000 men.

Russia this year will spend 14,800,000,000 rubles (\$2,960,000,000 under the new official exchange rate) on armed forces, Gregory Grinko, commissar of finance, announced to the all-Union central executive committee. The committee unanimously approved the proposal.

Last year's war budget was 6,500,000,000 rubles, but the expenditures actually reached more than 8,500,000,000 rubles.

Grinko also announced 28,700,000,000 rubles will be used this year for construction work, a large part of which will go to the reconstruction of Moscow and Leningrad.

## May Protect Indians

### Old Treaty Covering Hunting Produced In Ontario Court

Wallaceburg, Ont.—A clause of what is believed to be the Jay treaty effected by Governor Simcoe in 1792 and stating that Indians may hunt within 16 feet of the banks of any creek in Canada, was produced in court here by R. A. Carscallen, lawyer defending two Indians on an illegal hunting charge. The case was that Magistrate S. B. Arnold reserved judgment in the case for a month while he investigates the authority of the Jay treaty in relation to present day conditions.

### PRINCE BUYS A FANCY COSTUME

Here we see His Royal Highness the Prince of Wales leaving a famous London costumer's shop after being fitted with a fancy dress costume which he wore at a New Year's Ball in London.

## OIL SANCTIONS PROPOSALS HELD IN ABEYANCE

London.—In a London thick with gloomy fog the cabinet met to discuss the next move regarding proposed oil sanctions against Italy. It was the first full cabinet meeting since Anthony Eden has attended as foreign secretary.

Eden will attend the league council meeting at Geneva, it is expected, with a "waiting policy." The foreign secretary, it is predicted, will round out the other delegations and after the usual Geneva conversations state the British position. That position, according to present indications, will be largely dependent on the situation as revealed at Geneva.

Factors entering into a more modified British attitude are: Reports that the league sanctions now in force against Italy are working better than anyone anticipated, thus rendering further action less urgent. Doubts whether oil sanctions are expedient at present in view of the existing Italian stocks, the opening of the "little rainy season" in Ethiopia, and uncertainty about the attitude of oil-producing nations outside the league.

On the other hand, the waves of protest which swept over Great Britain against the Hoare-Laval peace plan last month was a warning which no government, however strong, can afford to ignore.

As a shareholder in the Anglo-Persian Oil Company—which counts Italy among its customers—the British government feels particularly open to criticism. It may further be taken that if nothing is done on oil sanctions by the time the House of Commons re-assembles February 4, the opposition will launch a renewed attack.

"Big surprises" are in store for all Britons when the cabinet's national defence plans are announced, the Manchester Guardian said.

"Concern caused by German rearmament, while not recent, has been increased by the endless funds devoted by the reich to its armaments," the Guardian declared.

## Visits Mining Area

### Lord Tweedsmuir Interested In Technical Process Of Mineral Extraction

Kirkland Lake, Ont.—After visiting the Noranda mine, interesting himself in the technical processes of mineral extraction, the governor-general came to Kirkland Lake during his first visit to northern Ontario.

Much of what Lord Tweedsmuir saw at Noranda was new to him, but some was not. As he was guided through the extensive workings by President J. Y. Murdoch and General Manager H. L. Roscoe, of the mine, His Excellency was informed one particular machine was something of an innovation in gold mining.

Lord Tweedsmuir demurred. He had seen the operation once in the Rand, 30 years ago, and to his hearers he gave the place, the date and the name of the man in South Africa who had worked the machine.

## Must Pay Tax

### Civil Servants In Manitoba Drawing Pay From Federal Government

Are Liable

Ottawa.—The supreme court of Canada decided that Canadian soldiers and Dominion civil servants drawing pay from the federal government and living in Manitoba were liable for payment of the two per cent. income tax imposed by the Manitoba legislature in 1933.

The decision will affect more than 3,500 employees of the Dominion government and members of the permanent militia forces.

### Stockmen Ask Help

London.—A resolution calling attention to "the deplorable condition of stock-raising" in the United Kingdom and demanding immediate government help was adopted at the annual meeting of the National Farmers' Union.

## GO SOUTH, OR TO BED.

The rich go South in the winter. The hoboes without any money do it. Professional golfers do it. Geese do it. Race horses do it. Cattle used to do it, and would yet if they had a chance.

The point arises as to whether or not it is the proper thing to do. Is it a reasonable or natural thing to stay in Canada during the winter or if, for economic reasons, one stays, is it reasonable and natural to attempt to carry on ordinary commercial and social activities.

Fish, mud turtles, bears, bees, squirrels, snakes, flies, muskrats, hedgehogs, and most of the other forms of life, which have no rapid means of transportation and are thereby compelled to stay in the northern half of the continent during the winter, do not attempt to carry on their ordinary activities; they go to sleep. Is that the proper thing to do? Are these intelligent people wrong?

Look at the people who stay in the north and attempt to carry on their ordinary activities: Wolves, bankers, moose, coal merchants, poolroom proprietors, politicians, preachers, musicians, domestic fowl, plumbers, newspaper reporters, billiard players, convention orators, house cats, bridge players and college professors. Are the members of this group wiser than the bees and bugs and senators? Wouldn't the country get along more scientifically and naturally if they all went into hibernation?

Having thus proposed the subject for the debate, we dispense with the argument and announce the decision.

Making all due allowance for the inevitable exceptions, it would appear that obedience to natural law should induce all the people in Canada to either go South or go to bed during the months of December, January and February.—Harris Turner, in The Western Producer.

## WORRYING ABOUT THE JONESES.

The pioneers who had to clear homesteads in the hardwood forests of eastern Canada had bears and wolves to fear. The Western pioneers also had hardships and dangers to face. But with all the difficulties and dangers of the pioneers, it is doubtful if they suffered more dread than some people of today do of the opinion of the Joneses they are trying to keep up with, instead of being simply themselves. Why should anyone think that his life should be a standardised thing like a machine made product identical with all the others turned out by the same manufacturing company? If the Philosopher thought that mottoes and slogans did much good, he would like to suggest "Be Yourself." Every human being should have his own individuality and do his own thinking, and make his life not an imitation but a real life.—"The Philosopher," in National Home Monthly.

## STOP THE TAX SALES.

The Provincial Government is taking the right step, in preventing municipalities selling taxpayers, property for arrears of taxes except where this is "absolutely necessary." And even where such sales are held to be necessary, they are usually "bad business." Depriving a taxpayer of his property for a fraction of what it is worth is a penny-wise-and-pound-foolish policy, irrespective of the principle involved.

### Succeeds Magrath.

Hon. Charles Stewart, ex-Liberal Minister of the Interior and former Member for Edmonton West, who has been appointed Chairman of the International Joint Commission. Mr Stewart succeeds Mr Charles A. Magrath, who has resigned.

### Christian Science.

At all Christian Science churches next Sunday, the subject of the Lesson-Sermon will be: "Truth." The following is one of the Scriptural quotations contained in the Lesson-Sermon: "Study to show thyself approved unto God, a workman that needeth not to be ashamed, rightly dividing the word of truth" (1 Timothy 2:15). One of the correlative passages from Science and Health with Key to the Scriptures by Mary Baker Eddy, is as follows (Preface vii): "The question, What is Truth, is answered by demonstration—by healing both disease and sin; and this demonstration shows that Christian healing confers the most health and makes the best men."

### Hollywood Pays Wages of Death.

Life is cheap in Hollywood—and death on the battlefield is much less profitable than death thru a domestic mishap.

Here are specimens of wages paid to extras who "die" for screen purposes—

Death on the battlefield \$5.00; death fall from a balcony or down a flight of stairs \$25 to \$50; dying in bed \$2.50.

In addition, the actor receives the usual rate of pay for a day's work at the studios.

## The Man Who Knows

Whether the Remedy You are taking for Headaches, Neuralgia or Rheumatism Pains is SAFE is Your Doctor. Ask Him

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches; or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin".

We say this because, before the discovery of "Aspirin", most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember, then, "Aspirin" is rated among the fastest methods of getting relief of the relief of headaches and all common pains... and safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited. Look for the name "Aspirin" in the form of a cross on every tablet.

Demand and Get

"ASPRIN"

FLEMING'S FOLLY

— BY — LAWRENCE A. KEATING

CHAPTER V.—Continued

Both men froze at the ringing command from Sheriff Ames Stephen. "We had enough gun-talk to-day," he remarked coldly. "What's the matter here, can't you men get along?"

"He called me a liar," Roper growled.

"He did distort the truth a bit, according to my views. Helen," Link went on directly, "are you heading out to the ranch?"

"Why—uh, I'd sort of planned going that way. Helen," Kilgo interposed, rubbing his jaw. She hesitated while the three men watched her. "Why yes, but there's something important I want to talk to Link about."

His face lighted slowly with a knowing grin. "Shore, I saw! I'll come over tonight and have a good talk. Remember what I told yuh, Helen—"

"About trying to buy me out so as to protect her from my bad influence?" Link grinned. "That's stretch-

ing the truth too, Roper. There was a queer shooting scrape at my place that night—"

"Shootin'?" Helen exclaimed. "Nobody told me about it!" Ames Stephen growled.

"Probly some guy ridin' home drunk. Nobody got hurt."

Fleming turned to him and bowed. "Thanks to poor marksmanship. Better get someone else next time, Roper."

He bristled again. "Are you tryin' to make out I put some guy up to that?"

Helen darted between the men, both of them rising to hot anger again. "Stop! Why, Link, whatever possessed you? I've known Roper for years and I know he wouldn't have anything to do with an attempted murder. That is too much, altogether too much. Whatever you think of him, it's foolish to call a man a killer when you haven't the slightest proof. I—why, Link, I'm surprised at you!"

He stepped back in dismay. The suddenness of her defense of Kilgo brought a look of perplexity to the rancher's rather handsome face. Fleming avoided her accusing eyes. Seemingly he had overstepped himself. The heightening sense of trouble brewing, with Roper as his chief antagonist had, perhaps, caused him to be indiscreet.

"Aw, Link, let's forget it. Come on, what do yuh say?" The other shuffled forward wearing a forced smile of friendliness. One hand was thrust out in the pretense of forgiving. Link eyed him an instant. Then his lids lowered and his voice sounded cold and controlled.

"That's just a grandstand play, and you know it. There's no friendship between us!"

He turned on his heel and started off. But with a gasp Helen scurried after and seized his sleeve. "Link, please! Why not be friends? If you won't," she hinted with color draining from her cheeks, "I—I'm afraid you will have made a choice. Roper is a good friend of Buzz, and he has known Buzz and me longer than—than you have. I mean, well—almost anyone who is a man is willing to forgive and forget. Are you trying to make trouble?"

He hesitated, unwilling to pretend contrariness for one whose face and words were a mere mask of his true feelings. But Helen's meaning was clear: she was insistent upon this handshake to restore peace. Perhaps she felt it her duty to bring them together on a new basis. Roper considered himself practically engaged to her. What was her real feeling about that?

A partnership in irrigation could not be successful unless there was harmony between them. And—Link's pulse sped faster—wanting that genuine concern in the girl's eyes, concern for his well-being if he had an influential enemy in Kilgo?

He hesitated himself for doing it, yet felt he must. Sheriff Stephen watched the tableau in silence. Fleming raised his hand, pressed Roper's briefly, then turned away.

"Shall we start now?" he asked in a low tone.

As they rode off Link had an uncomfortable suspicion that somehow Kilgo had bested him in the scene. He cast a sidelong glance at Helen and found her uncommunicative. When they reached Rawhide and were walking their horses down its main street Otto Pieper emerged from his bank. He sighted the girl and beckoned.

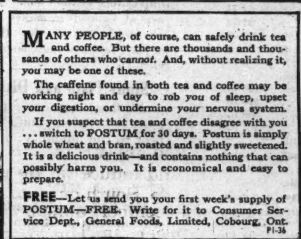

"I'm sorry, but I forgot I'll have to stop and talk to Mr. Pieper. You see, I want to find out just what the condition of the Triple H is, how much money we have and all that." He considered offering to wait, but felt instinctively that she might prefer to go on alone—or to have Roper, who rode with several other men a half mile behind, escort her home.

"By the way," Link said, drawing his buckskin near as she dismounted before the bank. "I don't want to press you about this irrigation business, but I'm wonderful if you really want to come in with me. Maybe you'd like to think it over real careful, now Kilgo—er, folks are so set against it."

She tied her pony, then smiled at him from the sidewalk. "I've decided to go into it. And I never back out of a thing, Link."

His heart leaped. It was true that Triple H land adjoining his Star Loop spread would benefit the most, was the local outfit to club with him for the erection of a dam to back up

## Mr. CAFFEINE-NERVES finds out who is boss

Silver Creek.

"When can we get down to bed rock on this proposition?" he asked. "The thing should be started now so we'd get an alfalfa crop early next summer. If we wait till spring it'll be that much longer for a return."

She hesitated, then spoke what was on her mind. "Link, I didn't want you to have more trouble with Roper—that's why I asked you to shake hands with him. I came with

you now to say that. Perhaps you don't like him, but after all, he is a friend of mine."

He flushed and made no reply. "But I'll tell him not to come to the ranch to-night. You come, Link, and we'll talk over all our plans for irrigation. Why not come early, for supper?"

The Box 50 owner, Benson and Sheriff Stephen were dismounting a few yards away. Fleming felt certain Kilgo had heard Helen's invitation. He could not restrain a thrill of triumph. "Fine, I'll sure be there!" Turning his mount, he started at a brisk run for the Star Loop.

Pieper, he knew, would attempt to talk her out of participating in what the conservative banker now regarded as a "wildcat" scheme. Otto's habit was to believe what the majority of local citizens believed; he had discovered long ago that such a policy kept him in the good graces of influential men who might otherwise have ousted him from the bank presidency. Link hoped that Helen would not state her intention to Otto. As for Kilgo, he felt certain now the man could not persuade her out of the partnership.

### Hard Year For Trappers

Far Catch Lower Than Last Season

Which Was Poor That same system of relief for Indians and trappers operating in northern Saskatchewan furlands will be essential unless trapping of beaver is made legal in the spring was the note sounded in reports of hardship brought to civilization with Pilot Angus Campbell of the M. and C. Aviation Company.

With the fur catch estimated as between one-third and one-quarter of last winter, in itself considered a poor year, trappers are facing difficulties hitherto "unencountered," he said. 2134

### BACKACHE

IF you have backache, dizzy spells, headaches, do not neglect your kidneys. Take Gin Pills for prompt relief at the first sign of these symptoms. You will feel better, look better—be better, if your kidneys are functioning properly. 24

Surplus of assets over lia- bilities.....	24,318 77
	\$24,756 23

R. S. LAW.

Mr. Law, as President and General Manager of United Growers Limited, is to take up his residence in Alberta within a few months.

The Board of Directors of the Company has decided to establish the office of the President and General Manager at the Calgary Office. That office has been in Winnipeg since 1917, when the Alberta Farmers' Co-operative Co. amalgamated with the Grain Growers' Grain Co. to form United Grain Growers Limited.

Although the Company operates extensively in all three prairie provinces, the extent of its business is much larger in Alberta than in either Saskatchewan or Manitoba. That fact together with the importance of the Company's business at Vancouver, makes Calgary a suitable location for the office of the President and General Manager.

#### Stony Plain and District.

All flags in town are half-mast at present, out of respect to the memory of King George V.

Alvin Willie has gone to Chilliwack, B.C.  
Hy Trapp is attending the sessions of the Radio School, in Edmonton, this week.

The rink of lady curlers, skipped by Mrs. Hy Oppert, hauser, which went to the City Tuesday, won over the City ladies 2 out of 3.

Taxis held their first annual skating party Thursday night, and had a good attendance. Hot dogs, band music and coffee were on the program.

The annual meeting of the ratepayers of the Stony Plain Consolidated S. D. No. 52 has been called for Tuesday next, Jan. 28. The meeting will be held in the town hall.

The Intermediate C.G.I.T. are holding a Potato Social in the United Church on the evening of Friday, Jan. 31.

New and second-hand text books for public and high schools on sale at The Sun Book Shop.

BUTTER AND EGGS WANTED  
at The Royal Cafe.

#### Obituary.

On Monday Jan. 20 an old-timer of Duffield Dist. passed to his reward in the person of Paul Wagner. Deceased was 70 years of age and had lived in the district for 31 years. He is survived by his wife; 8 sons, Alphonse, Ferdinand, Rudolf, Joseph, Karl, Gotthard, Bernard, Henry; 4 daughters, Rev Sister Clement of Regina, Mrs. Mary Belter of Uking, Helen and Emma. The funeral will take place Thurs. Jan. 23d, at 11 a.m. at Duffield. Rev C. Keenan will officiate.

#### Brightbank Items.

The cold weather has caused the coal miners to put on a double shift of men. It is reported the Log Cabin Coal Co. has 3 shifts working.

Mr and Mrs Herbert Sterling, oldtime residents of this district, are leaving in a short time for Victoria, B. C., where they intend to make their home in future. Mr Sterling has been a successful farmer in this locality for over 30 years. Miss Bernice and Miss Joan also are going with their parents. The remainder of the family will be carrying on the farming operations on their farm in this district.

Another oldtimer, Harry Clausen and family, who have been farming successfully in this district for many years, are reported as intending to sell their stock and equipment and leaving for San Francisco or Los Angeles. All their friends wish them every success in their new location.

We hear it said quite often that a church is to be built at Hansen's Corners next summer. Residents find it rather too far to go to Carvel or Bright Bank to attend service.

Mr Clarence Zahn was a Sunday visitor at the home of Mr Seaman.

In spite of the cold weather, the Social Credit Study Group are holding their meetings very regularly all winter, with President J. Kyle in the chair. The attendance is always very good.—D. M.

#### Spruce Grove News.

The St. Matthew Lutheran church (Canadian Synod) at Spruce Grove, on the Highways, is to be re-opened, after a lapse of a few weeks. The re-opening will take place on Sunday, February 2nd. The new incumbent, who is the Rev H. Bergius, from New Sarepta, who is to arrive at the Parsonage on Tuesday next, Jan. 28.

Mr Jacob Brox has been appointed a Commissioner for Oaths.

John Arkell, a resident of the Spruce Grove district for the past 15 years, passed away in an Edmonton hospital on Thursday, January 16, at the age of fifty-three years.

#### Short Circuit in Radio Battery Causes Fire.

Warden J. H. R. Jackson was awakened on Monday morning by the odor of smoke and upon investigation found a brisk blaze in the living room, with the flames already eating away at the wall and floor near the blazing radio. With the assistance of a visitor he was able to get the fire under control before the fire truck responded to a call and completed the task. Had the blaze got underway in the night, much more damage would have resulted. The radio was destroyed, and part of the side wall and floor. The fire was presumably caused by a short circuit in the radio, a battery model.—Edson-Jasper Signal.
